A COMMITMENT TO QUALITY & THE SAFETY OF YOUR WORKFORCE

Sub-Tech Systems was formed in 1999 in response to the demand for high quality servicing and testing of equipment within the commercial diving industry. Our aim is to provide an engineering facility for the servicing, testing and calibrating of all commercial diving equipment to the highest possible standard.

Our head office and production facility is located in the UK, in the ship building town of Barrow-in-Furness, where we provide modern testing and re-calibration equipment for both on and off the premises. The company prides itself on the development of new products such as diving helmets and hyperbaric equipment.

Sub-Tech Systems provides an in-expensive, fast-turn round service with the main priority of creating safety within the industry.

COMMERCIAL DIVING & HYPERBARIC PRODUCTS

We stock a wide range of products for the commercial diving and offshore industry and can supply products across the globe.

You can see a wide-range of our own products as well as products from industry leading suppliers on our website at: www.subtechsystems.com. If you can't find something you are looking for or require a bespoke product to meet your company's needs, please give us a call on +44 (0) 1229 820400 and speak to Lisa from our Sales Team.

GIVE US A CALL TODAY ON +44 (0) 1229 820400 AND USE THE EXPERTS IN DIVING AND MARINE EQUIPMENT.
